

RIU-IP

Remote IP Interface

Product Overview

The RIU-IP is a remote control interface designed for innkeeper 2 and innkeeper 4 digital hybrids. This unit contains a web server which allows the user to send and receive control data through their web browser. RIU-IP can be connected to the user's computer NIC card for direct control, to a switch or hub for network control, or to an ethernet port with internet access for control from anywhere in the world.

Features

- Connects to innkeeper 2 or innkeeper 4 Digital Hybrid
- RJ45 Ethernet port
- RS-232 remote control port with simple ASCII protocol
- No external power required

Remote Control Capabilities

- Indication of incoming ring per line.
- On-Hook and Off-Hook
- Confirmation of Off-Hook on On-Hook transition per line.
- Place call on hold or release hold.
