New Product Press Release

BluePack - Wireless Interview Tool

JK Audio combines Bluetooth Wireless Technology with professional audio electronics in a rugged new belt pack design.

BluePack allows live man-on-the-street interviews through a cell phone equipped with Bluetooth Wireless Technology. This sleek belt pack provides a professional look and feel to field reporters and remote talent.

BluePack pairs to your cell phone like a Bluetooth wireless headset. This professional microphone preamp and powerful headphone amplifier make sure the message gets through. A 3.5 mm stereo line input jack allows recordings to be mixed into the broadcast. The 3.5 mm stereo line output jack provides your full bandwidth microphone signal on the left channel and Bluetooth audio on the right channel.

The stereo headphone output gives you a mix of the XLR microphone input, 3.5 mm input, and Bluetooth audio. This powerful ½ watt stereo headphone amplifier will cut through any crowd noise. BluePack also pairs to Bluetooth equipped sound cards and music players in full bandwidth stereo A2DP mode.

Features:

- Bluetooth Wireless Technology
- XLR Mic Input
- 3.5 mm Stereo Line Input
- 3.5 mm Stereo Line Output
- ¼" Stereo Headphone Jack
- >10 Hours on one 9 Volt Alkaline Battery
- Size: 4.7" x 3.75" x 1.65" (12 x 9.5 x 4.2 cm)
